INTERNATIONAL EQUIPMENT COMPANY.....	Boston, Mass.		

Note to Contributors

Bacteriological Reviews is published under the auspices of the Society of American Bacteriologists to provide authoritative, critical surveys on the current status of subjects and problems in the diverse fields of microbiology. This includes the occasional short monograph.

Suggestions for timely reviews are solicited; and prospective authors are invited to discuss with the Editor the suitability of their proposed manuscripts. The submittal of a synopsis or topical outline for an advisory opinion is recommended. Except as noted under *References* the editorial style of *Bacteriological Reviews* is the same as that of the *Journal of Bacteriology*. Contributors should consult the Instructions to Authors published in each issue of the *Journal* for details. In addition, the following suggestions may serve as a general guide.

Plan and Content of Review. A rational, balanced development of the topic, rather than a chronological treatment, is to be preferred. Old history, if any, may be covered usually by simple reference to earlier reviews. A mere compilation or annotated bibliography does not adequately serve the objectives of this journal. The extensive presentation of new experimental material belongs properly in the domain of the monograph or of the appropriate "experimental" journal.

References. Judicious selection of references is an important function of the reviewer. Cited references should be listed alphabetically according to author and numbered serially, the numbers being used in the text. The full title of each paper should be given. Each citation should be checked with the original publication to avoid embarrassing errors. The system used in *Chemical Abstracts* for abbreviations of journal names should be followed.

Length. The length of a paper is no measure of its quality, and it is only the latter that determines acceptability for publication. However, practical considerations make it desirable to set a provisional limit of 30 to 40 printed pages for a review, text, tables, figures and references included. (About 10,000 words go into 20 pages; 24 references per page.) A short monograph must come within the size of a single issue, about 100 pages.

The acceptability of a review cannot, of course, be finally decided until the finished product has been examined. Acceptance of a short monograph, is also contingent upon the advice of the Editor of the *Journal of Bacteriology*.

Correspondence relating to editorial matters should be addressed to the Editor:

PROF. PERRY W. WILSON
Department of Bacteriology
University of Wisconsin
Madison 6, Wis.

BACTERIOLOGICAL REVIEWS

Manuscripts should be sent to Professor Perry W. Wilson, Department of Bacteriology, University of Wisconsin, Madison 6, Wisconsin.

One hundred reprints, without covers, of articles will be furnished gratis to contributors when ordered in advance. A table showing cost of additional reprints, with an order slip, is sent with proof.

Correspondence concerning business matters should be addressed to The Williams & Wilkins Company, Mount Royal and Guilford Avenues, Baltimore, U. S. A.

BACTERIOLOGICAL REVIEWS is issued quarterly in March, June, September, and December. The four numbers published in one calendar year constitute a volume.

The subscription price is \$5.00 per volume. For countries outside the Postal Union, add 50 cents a volume. Bacteriological Reviews is delivered free, however, to all subscribers to the Journal of Bacteriology.

Claims for copies lost in the mails must be received within 30 days (domestic). Changes of address must be received within two weeks of the date of issue.

Subscriptions should be renewed promptly—To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.
